Matters need attention when charging

- Before the first use of the car, make sure the battery has been charged,(4-6 hours, or the battery would be damaged permanently and cannot be repaired). When charging, first open the charging cover and then insert the plug into the charging hole, and then plug the charger into the power socket. The vehicle cannot operate during charging. (The charging process has to be operated by adults)
- 2. When the battery is low, please charge it in time. Normally the charging hour is 8-12 hours, but do not charge it more than 15 hours.
- 3. It is normal that the battery jar emits heat (below 60 centigrade), but when the temperature is too high, you should examine whether the recharging process is short-current.
- 4. Only chargers and battery equipped by this car can be used. Chargers and battery jars of other brand are strictly prohibited. Or the charger and battery might be damaged.
- 5. The car cannot be operated when charging.
- 6. New/old and different kinds of batteries cannot be used together.
- 7. Please check the circuit when the car is charging.
- 8. When the product is packed away or will not be used for a long time, you have to fully charge the battery and charge it once every month to guarantee the life of the battery.
- 9. The charger and battery is not toy. Children should not be allowed to play with them.

a. On-off switch—(1) The platform is energized, the lighting system lights up with the engine sounds; (2) The dashboard is equipped with a music function operator, which can be connected to the mobile phone B))) device, volume adjustment, power display and other functions.
b. Steering wheel—(1) the steering wheel is equipped with music buttons.

c. The lighting system switches with one button----(1) Light can be turned on and off.

d. High low speed switch——(1) This car can switch between high speed and low speed freely, having different driving pleasure.

Simple maintenance

...

Fault type	Reason analysis	Exclusion methods		
	Battery has low voltage	Recharging the battery		
	Battery is broken	Replace new battery		
Car's not moving	The nut of the wheel is dropped off	Screw the nut on		
	Motor is broken	Go to the maintenance area		
	Socket connector of the battery has been missing	Replace new socket connector		
	Fuse wire is broken	Change a new fuse		
	Power is turned off	Turn on the power		
	Battery is without power	Recharge the battery		
	Dead battery	Change motor		
Low speed	Pavement irregularity	Ride on smooth-riding surface		
	Overload	Reduce weight		
	Battery is old	Change new battery		
	Charger or motor is broken	Change new charger or motor		
Battery cannot be recharged	Socket connector of battery is broken	Change new socket		
	There is no power	Plug it in		
Short flight mileage	Battery off	Recharging the battery		
Short llight filleage	Battery is old	Change a new battery		
	Connector cable for lens motor contact poorly	Reconnect it		
Car is shaking when progressing	There's dead spot on the motor	Repair it in maintenance point		
Car has noise when progressing	Gear case is broken or run out of gas	Replace gear case or supply gas		
	Gear is broken	Change a new gear
